Interesting Internet Finds – December 2014  
Steve Costello, Editor, Boca Raton Computer Society, Florida  
January 2015 issue, Boca Bits  
[www.brccs.org](http://www.brccs.org)  
editor (at) brccs.org)

In the course of going through the more than 300 RSS feeds, I often run across things that I think might be of interest to other user group members.

The following are some items I found interesting during the month of December 2014.

An Introduction and a Quick Guide to Sandboxie

<http://www.techsupportalert.com/content/introduction-and-quick-guide-sandboxie.htm>

You have probably heard Sandboxie mentioned at the Freeware SIG, or a general meeting. If you use Microsoft Windows, using Sandboxie is recommended. This post tells what Sandboxie is and does, as well as a quick guide to using Sandboxie.

Android 5.0 Lollipop Review: An Ambitious Start Down Android's New Path

<http://www.greenbot.com/article/2850968/android-50-lollipop-review-an-ambitious-start-down-androids-new-path.html>

If you have been hearing about Android 5.0 Lollipop, but have not been able to get it yet, read this post to learn what it is all about, and what it means to you.

How to Use Skype on Android For Beginners

<http://www.makeuseof.com/tag/use-skype-android-beginners/>

I have found that a lot of Android users don't know they can get Skype on their smartphone/tablet. If you are one of these Android users, check out this post from MakeUseOf.

All the Wget Commands You Should Know

<http://www.labnol.org/software/wget-command-examples/28750/>

Do you remember Wget? This post has 20 examples of using the utility.

Wikipedia says:

"GNU Wget (or just Wget, formerly Geturl) is a computer program that retrieves content from web servers, and is part of the GNU Project.

Its features include recursive download, conversion of links for offline viewing of local HTML, and support for proxies. It appeared in 1996, coinciding with the boom of popularity of the Web, causing its wide use among Unix users and distribution with most major Linux distributions. Written in portable C, Wget can be easily installed on any Unix-like system and has been ported to many environments, including Microsoft Windows, Mac OS X, OpenVMS, HP-UX, MorphOS and AmigaOS."
