I am sure there are times you would like to answer your own question about your cars performance before you take it somewhere to have work done. You would like to know basically what is wrong with your car if you suspect a problem. Or, even if you don't have a problem you would like to know how your car is performing.

Well now you can do that. Every new car since 1996 has a port for plugging in a device to examine your cars performance.

This new device will instantly diagnose your car's problems for you and translate them into simple, easy-to-understand terms – and much more! Meaning, the next time a mechanic is trying to pull one over on you, you can call them on it! It's called FIXD. It is the first easy-to-use car health maintenance monitor.

BEST PART: When that "Check Engine Light" comes on, FIXD tells you exactly what's causing it in a way anyone can understand. No more looking up codes or taking it to the dreaded auto shop only to be given a list of unnecessary repairs – never again! You can also turn off the check engine light right from the FIXD App if the problem is not serious or if you want to see if it will reoccur. How cool is that?!

Sounds Great, But How Much Does It Cost? With all the benefits FIXD provides, you'd think it would cost a few hundred dollars, right? That's what makes this company so great. The founders of FIXD made it incredibly affordable so they can help as many people as possible avoid getting scammed by mechanics, while also staying on top of their car's health. It retails for only \$59 and you can purchase it on their official website. <https://www.fixdapp.com/>

Don't wait until it's too late! A small investment of a little more than that cost of an oil change can keep your car running smoothly and out of shady auto shops.
